SYSTEMS

## SILENT ORDERING SYSTEM

### Terminal/central

Supply: 12AC

Power: max 250 mA

Keyboard: 12 keys numeric

Display: 2 or 3 digits, red LED

Communications: 433,920 MHz

Legal, authorized, and licensee-free frequency.

Can be used without any further approvals or costs.

Transmit power: 10 mW

Range: 130 meters indoors and 250 meters outdoor

### Disc

Supply: 3VDC, button cell

Power consumption:

Active 1.3 mA (out of holster)

Inactive 110 uA (in holster)

### Financing

We offer financing: Investment may be spread over a number of months. The system can also be rented for a 2 or 3 year period, with or without out purchase rights.

### Installation

We install the system and teach staff in less than two hours. Includes a simple and concise user guide.

## DISCREET COMMUNICATION AND GREATER EFFICIENCY

#### DISCREET COMMUNICATION AND GREATER EFFICIENCY - WITH A SIMPLE DISC

The situation is familiar: There are many guests in the restaurant, at the café or in the cafeteria. Some are waiting to order, others are waiting for their food to be ready. Some ask when food is ready and where they can collect it. Others ask staff for updates on their order.

The Silent Ordering System makes it possible to communicate with customers in an efficient, discreet and comfortable way.

#### HOW THE SILENT ORDERING SYSTEM WORKS

Once guests have ordered and paid for their food, they are given an electronic disc. The customer takes the disc to their table. When the food is ready, you send a signal to the disc which beeps and flashes discreetly. This lets the customer know that their order is ready to be collected. While guests are waiting for their food, they keep a close eye on the disc. It may therefore be a good place for branding, advertising or cross-selling.

#### ADVANTAGES OF SILENT ORDERING SYSTEM

- No scratchy speakers, unclear calls or displays  
– more peaceful atmosphere
- No long queues – less stress for guests and better opportunities for incremental sales
- No confusion about customers orders  
– everyone gets what they ordered
- International communication  
– beeps and flashes are understood by all
- No “lost” guests  
– the disc can also be taken outdoors
